Subject: Arsenic -- HB violations not RTC and PWSs in violation, national
Attachments: Violations_national_HB_As_not RTC_FY14-FY17.xlsx; Violations_national_HB_As_not RTC_FY14-FY16.xlsx

Corine, attached are the national arsenic violations workbooks from today and from about a year ago. Region 9's count of 187 PWS with open arsenic violations is about 44% of the national total of 428, about the same as last year.

The workbook from last year covered the three years of FY14-16 and today's workbook updates that through FY17 (a four-year period). If you want to compare the most three-year period like the previous workbook, I can delete the FY14 violations from today's workbook and refresh the summary tables and graphs.

Please let me know if you need me to refine this.

Don
